

Lead Infrastructure Planner – Infrastructure Standards

Position Description

Directorate	Infrastructure Planning	Department	Strategic Infrastructure Planning
Reports To	Coordinator Statutory Infrastructure Planning	Direct Reports	Yes
Queensland Local Government Industry Award - State 2017 - Stream	Stream A - Division 2, Section 1 - Administrative, clerical, technical, professional, community service, supervisory and managerial services	City of Moreton Bay Certified Agreement 2025 EBA6 Wage Level	Schedule 1, Level 8

Position Purpose

Lead complex policy and strategy for infrastructure design and construction standards by defining technical requirements, establishing standards direction, within Council's infrastructure policy and network planning framework, and advising on long-term asset performance, safety, and maintainability outcomes.

Key Responsibilities and Outcomes

As a Lead Infrastructure Planner (Infrastructure Design & Construction Standards) and member of the Strategic Infrastructure Planning Department you will:

- Lead development of infrastructure design and construction standards, specifications, and technical frameworks defining delivery requirements, asset acceptance criteria, and long-term infrastructure outcomes.
- Lead development of policy and advisory material integrating engineering, operational, asset management, safety, financial, and governance considerations into defensible technical advice.
- Coordinate specialist inputs across engineering, planning, asset management, operations, project delivery, and finance disciplines to inform consistent infrastructure standards.
- Establish infrastructure design and construction principles and evaluation frameworks guiding infrastructure delivery, asset acceptance, and lifecycle management decisions.
- Provide expert policy advice to senior leaders on infrastructure standards, technical trade-offs, asset performance expectations, and emerging industry practices.
- Provide feedback on standards implementation experiences, including challenges and opportunities, to inform the continuous improvement of Council overarching infrastructure policy and network planning framework.
- Respond to sensitive or escalated infrastructure standards matters with authoritative technical advice supporting consistent and defensible infrastructure outcomes.

Our Values

Our values:
guiding how we
work and shaping
our future.

Decision Making

<i>Budget</i>	N/A
<i>Delegations</i>	Delegations under the Local Government Act 2009 and as directed and published in Council's Delegation Register

Knowledge & Experience

- Extensive experience leading infrastructure design standards, engineering specifications, asset acceptance frameworks, or related technical governance programs.
- Advanced understanding of infrastructure design, construction practices, technical standards, and whole-of-life asset management principles and how they can inform improvements in overarching infrastructure policy and network planning.
- Demonstrated experience providing technical oversight and direction to team members.
- Substantial experience in the delivery of large-scale and complex projects.
- Demonstrated experience leading multidisciplinary technical standards development and review processes.
- Strong analytical capability balancing service outcomes, operational requirements, compliance obligations, and lifecycle asset considerations.
- Proven experience advising on complex or high-profile infrastructure standards matters.
- Highly developed communication skills for executive, technical, industry, and governance audiences.

Qualifications

- Tertiary qualifications in engineering, planning, asset management, or related discipline (or equivalent experience).
- Current C Class Driver's Licence.

Note: This position description reflects a summary of the key accountabilities of the position, it is not intended to be an all-inclusive list of duties, steps and tasks. Leaders may direct team members to perform other duties at their discretion.
